

The template is an outline for projection on the plasma screen through out the congress on a timed loop as an advert for the posters and for easy and quick reading for all .

The desktops will contain the template and 6 power point slides with the detailed information of the posters for access to all delegates through out the congress for individual reading and a folder/inbox will be designed/assigned to each numbered poster for questions and answers about the poster.

The most important information for the template is the title, authors, aim, conclusions and poster number.

The background or colour scheme can be changed to suit individual choices.

If the entire poster **cannot** be copied onto the template then the 6 power point slides can accommodate other specific details of each poster. If the entire poster does fit onto the template then the individual sections can be repeated on the 6 power point slides adding any extra details within the text boxes, if necessary.

Your presentation will be needed by 12th April.
